Professional Summary

Dedicated and ambitious graduate of B.E. in Computer Science and Business Systems, eager to leverage strong technical skills and analytical abilities to solve real-world problems. Demonstrates excellent communication and interpersonal skills, fostering effective collaboration and contributing positively to team goals. Passionate about continuous learning and applying innovative solutions in a dynamic work environment.

Experience

- **NxtGenAI** *January 2026 – June 2026*
  Java Backend Developer Bangalore, Karnataka
  - Developed and maintained RESTful APIs using Java and Spring Boot.
  - Worked on backend modules for an enterprise-level application following a layered architecture.
  - Built and maintained REST endpoints using Spring MVC annotations such as `@RestController`, `@RequestMapping`, and `@PathVariable`.
  - Learned asynchronous processing concepts using `@EnableAsync` and `ThreadPoolTaskExecutor`.
  - Debugged existing backend features while following coding standards and best practices.

Projects

- **AI-Powered Educational Platform**
  Python, RAG, Machine Learning, NLP
  - Developed an AI-powered educational platform using Python.
  - Implemented a Retrieval-Augmented Generation (RAG) model to retrieve relevant educational content and generate context-aware answers.
  - Used Machine Learning and NLP techniques to provide personalised learning support, answer student queries, and recommend relevant study materials.
- **Message Fraud Detection System**
  Flask, React, NLP, Machine Learning
  - Developed a full-stack fraud detection application using Flask for the REST API and React for the frontend.
  - Implemented NLP and machine learning techniques to preprocess and analyse message content for fraudulent, phishing, and spam patterns.
  - Used TF-IDF and Logistic Regression to classify messages as fraudulent or legitimate.
- **Library Management System**
  Java, Spring Boot, MySQL, Bootstrap
  - Developed a full-stack library management system using Spring Boot for the REST API and Bootstrap for the frontend.
  - Implemented JWT authentication with role-based access control for admin and user roles.
  - Built modules for books, authors, categories, borrow requests, returns, reservations, fines, payments, notifications, and audit logs.

Education

- **St. Joseph College of Engineering** *2022 – 2026*
  B.E. in Computer Science and Business Systems Mangalore, Karnataka

Technical Skills

- **Languages:** Java, C, Python, SQL
- **Frontend:** HTML, CSS, React, Node.js
- **Backend:** Spring Boot, Spring Web, Spring Security, Spring Data JPA, REST APIs
- **Databases:** MySQL, JdbcTemplate
- **AI Systems:** Claude Agents, LangChain, RAG, Prompt Engineering
- **DevOps & Infrastructure:** Docker, Docker Compose, Maven, npm, Git
- **Tools & Technologies:** VS Code, Postman, IntelliJ IDEA
- **Other:** MATLAB
